

# Siobhán Cullen

# Hey !

- Hi I'm Siobhán but you can call me Shiv. I'm sixteen years old and I am a student at St Mary's College Arklow, County Wicklow, Ireland.
- I am a Transition Year student who is taking part in the Comenius Project.

Me :) )

- My hobbies are horse riding, reading, sketching, taekwondo, gaelic football, singing, cooking, photography, and music.
- So between it all I'm pretty busy during the week. But music is a huge part of my life and I enjoy playing a few different instruments. As well as spending a huge amount of time listening to music and just spending time with my friends.

# Family

- I live with my parents, my brother and my two sisters. Six is a big enough number as I have a huge extended family with over 25 cousins on each side, but we are a tight knit bunch and get along great.
- When you have such a big family there is no better time then when we all get together. We have great fun always.

# School

- In my school, you have the option of going straight into fifth year or taking a year to study subjects that are not on the usual curriculum and to get more involved in sports, developing new skills and helping out in your local community. We still do our core subjects like English, Irish, math, Geography, History , and languages, but we also get to do subjects like Comenius, film studies, drama and computer accounting. I am taking part in the Comenius Project in my school.
