

## STUDENTS OF HENRI COANDA COLLEGE ABOUT POLITICS

Gabor Ioana

I ignore politicians. In my opinion, most politicians can not be trusted, they do not keep their word. They promise a lot but not do much for our country and for our future. Politics is a good thing, a good activity for our country, but we have elected the wrong people for politics. European Union is the most efficient way to communicate, socialize and interact with people of different nationalities. If I may say so, I believe that EU is our only chance to become more civilized, it should be like a second conquest of Dacia (the first one was made by the Romans). EU is a good thing for my generation. In our county there are 173041 Romanians, 1605 Gypsy, 191 Hungarians, 118 Hebrew, 83 – Germans, 80 – Csango, 52

Italians, 9392 - other ethnicities. There is no representation of the ethnicities in the county council, only in the Parliament.

Stoleru M d lina

Politicians love themselves, they have many defects and have a total lack of interest to the citizen. In the Local Council, there are 19 men and 4 women, so 21 percents are women. Most of the presidents of the committees are men: Committee on economic and financial activities, budget, investment; Committee on planning and urbanism, heritage administration and agriculture, Committee on marketing, tourism, public services and urban transport, electricity; Committee on law and order, public administration, public protection. Only for the Committee on Socio-cultural activities, religious affairs, education, health, family, work and social protection, child protection, sports and historical monuments, environment protection and ecological reconstruction the president is a woman. It is a good thing to be in EU because it will help us.

Radu Amalia

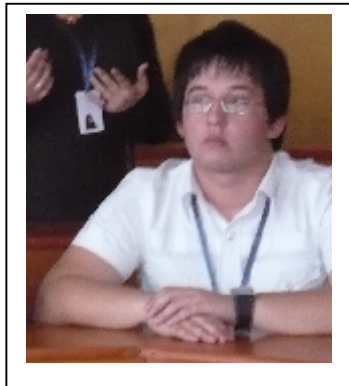

I ignore politics because the politicians are liars, frauds and they are making empty promises. Who divides, makes his hand! There is a small number of women in politics because we are a country with a misogynist "political culture" . The European Union is an alliance that has the power to establish strong relations between the states members. The advantages of Romania's EU accession can be divided into three major categories: economic (growth, improve living standards of population), political stability and security.

Mihaela Duman

I feel respect for the politicians and also discontent. I think they should pay us, the Romanian people, more respect. About the European Union I feel good, mostly. I can say is a good thing, mostly for our politics. In the Local Council, there are 19 men and 4 women, so 21 percents are women.

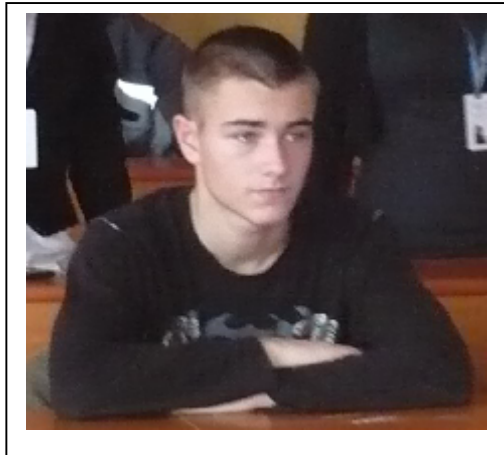

Andriescu Andrei

In my opinion, today politicians are very bad because they do not know how to lead this country and they will bring the total bankruptcy! They do not think or they are thinking very bad! They want to take the country out of crisis, but they are giving lower wages. So how they will get the country out of crisis? However, they know only to "stick in their pocket". The ordinary people are starving! Politics is a very complex thing because we need laws in our country. There are Romanians in the EU Parliament and this is a good thing. I feel good about our integration because in EU we have more opportunities and more "open doors". In the Local Council, there are more men - 80 percents.

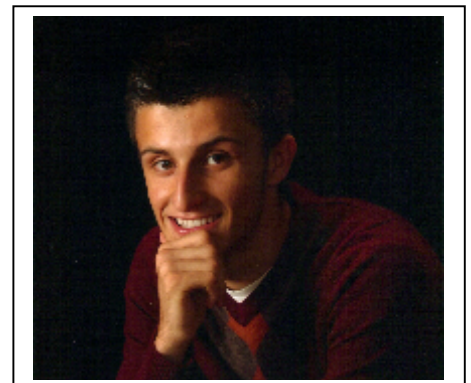

Cire ic Gabriel

I have a low opinion of politicians because they are selfish, lying and gather wealth. It is a great deal for us to be an EU country because helps a lot our development as a country. Equality between women and men is a fundamental right and a necessary condition for achieving growth and employment. Although there are still a number of inequalities concerning equal opportunities in politics, for men and for women. Although the EU is making progress giving women and men equal opportunities, women are underrepresented in political and economic decision in the last decade, despite the increased number of women who are leaders.

Andronic Maricel

I ignore politicians and politics in our country. I believe that our politicians do not really represent our country. I respect some politicians but not all of them. European Union is the "family" of the European countries. It is good thing that we are an EU country because we will grow in this "family". We have programmes for EU funds, we have freedom of travelling in EU, we can study in a EU country: France, Austria, Denmark, England. In our county, minority organizations are well represented, but there is no representation in the county council, only in the Parliament.

Cojoc Bogdan

I ignore politics. Maybe the politicians worked harder to be in this position, but there are not able to lead to economic growth, only to the degradation of living standards. I feel good being an EU citizen, I can travel in EU only using my national ID. In my opinion, it is best being in EU, but our leaders makes us difficult to find advantages.
